### Proposed Amendment No. 1

Proposing to amend Article VII, Section 10.2(E)(1) of the Constitution of Louisiana, relative to federal proceeds from alternative energy production on the Outer Continental Shelf; to provide for the disposition of revenues; to provide for submission of the proposed amendment to the electors; and to provide for related matters.

Do you support an amendment to require that federal revenues received by the state generated from Outer Continental Shelf alternative or renewable energy production be deposited into the Coastal Protection and Restoration Fund? (Amends Article VII, Section 10.2(E)(1))

Yes

No

#### Act 408 (2024 Regular Session)

**Present Constitution** provides for the manner in which the state treasurer makes required annual deposits into the Coastal Protection and Restoration Fund from federal revenues received by the state from Outer Continental Shelf oil and gas activity.

**Proposed Constitutional Amendment** retains present constitutional language and adds other federal revenue sources received by the state, including, but not limited to: wind energy; solar energy; tidal energy; wave energy; geothermal energy; and other alternative or renewable energy production or sources.

A "yes" vote means: Would allow federal revenues received by the state and generated from Outer Continental Shelf alternative or renewable energy production to be deposited into the Coastal Protection and Restoration Fund.

A "no" vote means: Would maintain the current system, where only oil and gas revenues contribute to the coastal protection efforts, without including potential new revenue from renewable energy sources.

### President of the United States
